- Water dispersible white-cream pellets / powder

COMPOSITION

Potassium Sorbate (1a)
Sodium Benzoate (1k)
Sodium Propionate (1k281)

Apply at 250g/T

SHELF LIFE**

24 months from date of manufacture.

*** enclosed in an appropriate packaging in a cool dry place*

DIRECTIONS FOR USE

Sil-All HAY+ is used at 250g/t of fresh forage. 1 bag treats 40t of fresh forage.

Recommended application rate is 1l/T.

Application rate 1l/T

Clean the applicator and lines to ensure there is no residual chemical from previous products. Rinse thoroughly. Dissolve 1 bag in 15l of water. Top the container up to 40l. Repeat for higher quantities. Apply at 250g/T. Sil-All HAY+ is ready to use immediately on hydration and is stable for 4 weeks. Apply Sil-All HAY+ to the hay over the pick-up, ensuring even distribution across the whole width of the hay.

HEALTH & SAFETY

Protective gloves and clothing, eye protection and face protection must be worn on handling.
